Pt is the second child of his parents. He has one sister.
 Pt is intelligent and always gets a good rank at school.
 He also gets a prize for the same. Pt is mild. Due to
 attack of breathlessness he is not able to concentrate
 on his studies.

Systemic examination: Respiratory system:

O/A: Rhonchi are present

Provisional Diagnosis: Bronchial Asthma

Miasmatic diagnosis: Psora-sycosis

23/12/07	c/o breathlessness since three days	Ars alb 200/ 3 doses, S.L. for 7 days
30/12/07	Relief in c/o Breathlessness	Sl for 1 month.
27/01/08	Again c/o breathlessness	Ars alb 200/ 3doses, S.L. for 7 days
03/02/08	Slight relief in c/o breathlessness	Ars alb LM/3 dose, S.L.for 7days .
17/02/08	Relief in c/o breathlessness.	SL for 30 days

15days

05/04/08	Relief in c/o breathlessness but c/o skin eruption on the hand and face	Sulph200/ 3 dose,S.L. for 2 wks
22/04/08	No relief in c/o eruption	S.L. for 2 wks
10/05/08	Eruptions are still present	Sulphur 0/6 for 15 days
25/05/08	Eruptions are increasing but they are just like old symptoms in childhood	S.L. for 15 days
2/06/08	Eruptions are still as they were	S.L. for 15 days
25/06/08	Eruptions are disappearing	S.L. for 1 month
27/07/08	Eruptions are disappearing	S.L. for 1month

Discussion of case: This case is of a charitable trust O.P.D where we are seeing more than 80 cases per day. We have hardly 10 minutes to take a new case. Initially on the acute totality Ars-alb was given but gave only temporary relief.

As an anti-miasmatic Nat-sulph was given, according to Boericke's Materia Medica, to prevent further attacks. Nat Sulph " ASTHMA IN CHILDREN, as a constitutional remedy". After that, eruptions started to appear and old symptoms were reappearing. This was

increasing and pt was not getting any relief. Parents were very much disturbed.

Due to family background and symptomatology, Sulphur 200 was given, but it was not giving the desired result, so L.M. Sulphur was given. But after that eruptions increased. You can see in this in the photographs. At this stage the advice of homoeopath Dr. N.R. Rangoonwala was sought. He advised to just wait and watch, which I did. After that the eruption decreased by 90% and most important, there was no attack of asthma. During the time of aggravation the parents had faith in homoeopathy and so continued the treatment. Their child is now free of asthma.

Conclusion: L.M. potency helped very much. It brought old symptoms back very quickly. It is very important to wait and watch when skin symptoms appear.

Interesting case – again it teaches us that very important rule of wait and watch. We are all too keen to respond to the pt's anxiety and jump in with another remedy.

Thanks for sharing this case.
