President Message :

MR. JAYANTIBHAI PATEL
CHAIRMAN,
VIDHYADEEP CHARITABLE TRUST

Inspired by the acceptance of Homoeopathy and its development worldwide, we at Vidhyadeep campus started Homoeopathic Medical college with attached homoeopathic Hospital for service to human being from Jan.-2016.

It is a great pleasure that Homoeopathic College is publishing its first E-Magazine. I congratulate the principal and all the Staff for this activity. Hopefully homoeopathic fraternity will get benefit from it. My best wishes to homoeopathic Institute for further endeavor also.

DR. VIPUL SHASTRI
PRINCIPAL - M.D. (HOM)

It's great pleasure to present the E-magazine of our institute Homoeo Vidhyadeep. Purpose behind this name is "With the Education(Vidhya) of homoeopathy light (Deep) of knowledge will be spread to the society". In this issue we have tried to cover the recent problem of post-Covid problems which is one of the problem in recent era. In this issue, post-covid problems and their homoeopathic aspect with Homoeopathic medicines, Rubrics and cases, activities and achievement of students and staff has been discussed. I am thankful to management for encouraging such activity.

PROFESSOR IN DEPARTMENT OF MEDICINE

POST COVID –SYNDROM
POST COVID EFFECT

- * Most people with covid-19 get better within weeks of illness, some people experience post covid condition.
- * Post covid conditions are a wide range of new returning or ongoing health problems people can experience more than 4 weeks after first being infected with the virus that causes covid-19.
- * Even people who did not have symptoms, when they are infected can have post covid-19 combinations of health problems for different length of time.

There are Certain Combinations of the following Symptoms :

1) General Symptoms

- * Fatigue, Fever, Body Pain, Dropsy
- * Dry Eye, Dry Mouth

2) Neurological Symptoms

- * Headache,
- * Brain Fag
- * Vertigo
- * Cognitive Impairment
- * Sleeplessness
- * Loss Of Sensation
- * Numbness
- * Trembling
- * Dull, Drowsy Feeling
- * Neurological
- * Peripheral Neuropathy Symptoms
- * Burning, Stitching, Priking Pain
- * Loss Of Muscular Power
- * Loss Grip
- * Anosmia

3) Respiratory Symptoms

- * Dry Cough
- * Catarrhal long Lasting
- * Chest Tightness
- * Pain On Breathing
- * Coryza With Loss Of Smell
- * Pleural Effusion

4)Gastrointestinal symptoms

- * Loss Of Taste
- * Bitter Taste in Mouth
- * Bloating Of Abdomen
- * Flatulency
- * Heart burn
- * Constipation
- * Diarrhoea
- * Loss Of Appetite
- * Nausea, Vomiting

5)Cardiovascular symptom

- * Chest Pain
- * Palpitation
- * Dyspnoea
- * Pulse – Slow, Fast/Irregular

6) Joint and muscle

- * Joint Pain, Arthritis, Poly-Arthralgia
- * Muscle Pain,Weakness in Muscle Power
- * Trembling, Staggering Gait
- * Difficult Walking
- * Wrist Joint Pain

7) Psychological / Psychiatric Symptoms-

- * Anxiety
- * Fear Of Death/Disease
- * Depression

8) Eye, Ear, Throat Symptom

- * Red eye sore throat, tinnitus earache, difficult deglutition

9) Dermatological

- * Skin rash (ringworm)

During Post Covid Syndrome following Vital Measurement is very important.

*** Pulse**

- * Respiratory Rate
- * Blood Pressure
- * General condition of patient
- * Heart sound assessment

*** Lab Investigation**

- * Hematological CBC with ESR
- * X-Ray Chest
- * C-Reactive Protein
- * Creatinine Level

*** Advanced [secondary] Lab Investigation**

- * D-Dimer
- * Troponin level& Cardiac markers
- * Ct/MRIof Chest /Brain
- * ECG
- * HRCT Of Chest

After taking normal diet if he or she should become energetic then and then it confirmed that your prescription is good. Pathological investigations - TC, DC, Blood Sugar, BP etc., measuring at routine check-up etc. are very useful for measuring the improvement in health status. (Ref.: <https://www.cdc.gov/>)

DR. AVINASH JAUNJALE, MD (HOM)
ASSISTANT PROFESSOR
DEPARTMENT OF ORGANON OF MEDICINE.

POST COVID PROBLEMS AND HOMOEOPATHY :

Covid has certainly changed the way humanity perceives diseases. Such fear and anxiety were rarely experienced by mankind. Though the world has developed certain ways to cope-up with this deadly disease, some patients who suffer with it experience a particular set of complications which may include.

- | | | |
|--|------------------------------------|---------------------------------|
| * Pneumonia | * Kidney Failure | * Pulmonary Fibrosis |
| * Viral Sepsis | * Cytokine Release Syndrome | * Pediatric Multi system |
| * Acute respiratory Distress Syndrome | * Respiratory Failure | * Inflammatory Syndrome |
| | | * Chronic COVID Syndrome |

Although most people with COVID-19 get better within weeks of illness, some people experience post-COVID conditions. Post-COVID conditions are a wide range of new, returning or ongoing health problems people can experience more than four weeks after first being infected with the virus that causes COVID-19. Even people who did not have symptoms when they were infected can have post-COVID conditions. These conditions can have different types and combinations of health problems for different lengths of time.

POST-COVID CONDITIONS:

1) Long COVID:

Long COVID is a range of symptoms that can last weeks or months after first being infected with the virus that causes COVID-19 or can appear weeks after infection. Long COVID can happen to anyone who has had COVID-19, even if the illness was mild, or they had no symptoms. People with long COVID report experiencing different combinations of the following symptoms

- | | | | |
|--|---------------------------------|---|---|
| * Tiredness or Fatigue | * Loss of smell or taste | * Chest pain | * Joint or muscle pain |
| * Difficulty in thinking or Concentrating (Brain Fog) | * Dizziness on standing | * Difficulty in breathing or shortness of breath | * Depression or anxiety |
| * Headache | * Palpitations | * Cough | * Fever |
| | | | * Symptoms that get wors after physical or mental activities |

2) Multiorgan effects of COVID-19:

Multiorgan effects can affect most, if not all, body systems including heart, lungs, kidney, skin, and brain functions. Multiorgan effects can also include conditions that occur after COVID-19, like multisystem inflammatory syndrome (MIS) and autoimmune conditions. MIS is a condition where different body parts can become swollen. Autoimmune conditions happen when your immune system attacks healthy cells in your body by mistake, causing painful swelling in the affected parts of the body.

It is unknown how long multiorgan system effects might last and whether the effects could lead to chronic health conditions.

3) Effects of COVID-19 Treatment or Hospitalization:

Post-COVID conditions can also include the longer-term effects of COVID-19 treatment or hospitalization. Some of these longer-term effects are similar to those related to hospitalization for other respiratory infections or other conditions.

Effects of COVID-19 treatment and hospitalization can also include post-intensive care syndrome (PICS), which refers to health effects that remain after a critical illness. These effects can include severe weakness and post-traumatic stress disorder (PTSD). PTSD involves long-term reactions to a very stressful event.

HOMOEOPATHIC APPROACH:

Dr Hahnemann has already explained about such occurrences in his Organon of Medicine. According to Dr Hahnemann these diseases 'have an identical origin, they set up in all those they affect an identical morbid process, which when left to itself terminates in a moderate period of time in death or recovery.' Peculiar acute miasms which recur in the same manner are the exciting causes and producers of such diseases (Apho. 73).

HOMOEOPATHIC MANAGEMENT:

The general concept in Homeopathy towards treatment of the sick is 'Treat the patient not the disease'. On a superficial sense, this may be preposterous, but in a deeper sense it conveys its holistic concepts towards the patient.

In disease condition symptoms are the language of the disease- the body's attempt to warn about the internal derangement of the person. Without symptoms, a person could not have illness. The symptom may be trivial or significant. This may be at physical, mental or at spiritual level. As experienced physician shall be able to identify the internal derangement through the signs and symptoms, even if it is trivial or insignificant to the patient.

In homoeopathy, medicine is prescribed after a detailed case taking, giving importance both to mental and physical attributes as well as any particular symptoms. Both subjective and objective symptoms have got its importance. The symptoms that represent the patient as a whole are of more value, especially such as are expressed in the patient's own words.

The basic objective is to find out the closest similimum to the patient's totality of symptoms perceived by the physician, through his skill, knowledge and observations. The physician has to take full case history to get the totality of symptoms, he has to evaluate the miasmatic background, past history etc to get more accurate prescription. This is the artistic aspects of case study peculiar in homoeopathy.

**The Physician's high and only
Mission is to restore the sick
to health, to cure, as it is termed.**

Dr. Samuel Hahnemann

DR. AVANI B. PATEL MD (HOM)
ASSISTANT PROFESSOR
DEPARTMENT OF ANATOMY

HOMOEOPATHIC MEDICINAL INDICATION FOR POST COVID COMPLICATION

1) ABROTANUM

- * Tubercular diathesis
- * Indicated in exudative pleurisy and other exudative process. (emphysema, empyema).
- * Also indicated in post chest operation pleurisy.
- * Weakness after acute viral infection.
- * Dry cough with diarrhea.
- * Pain across the chest, back pain, pain in lumbar region, pain in shoulder joint, arms, wrists and ankles.
- * Emaciation of body with excessive perspiration.

2) ADONISVERNALIS

- * Heart Symptoms after influenza, low vitality, weakheart.
- * Pulse - slow and weak.
- * Indicated in hydrothorax, ascites, anasarca.
- * Cardiac asthma, fatty heart, irregular cardiac action, constriction and vertigo.
- * Precordial pain, palpitation and Dyspnoea.

3) ALFA-ALFA

- * It helps to tone up the appetite and digestion.
- * Loss of weight, malnutrition, malnourishment.
- * Correct wasting during convalescence.
- * There is nervousness, insomnia, nervous indigestion, etc. present.

4) ALSTONIASCHOLARIS

- * A tonic after exhausting fevers.
- * All gone sensation in stomach and sinking in abdomen with debility.
- * Painless watery stool.

5) AMMONIUM CARB

- * There is discharge of burning watery discharge.
- * Stoppage at night, with long-continued coryza, cannot breathe through nose.
- * Hoarseness of voice. Cough at night (esp. 3 o'clock) with Dyspnoea, palpitation, burning in chest.
- * Chest feels tired. Much oppression in breathing. < any effort, entering in warm room.
- * Asthenic pneumonia. Slow, labored, stertorous breathing, bubbling sound.
- * Sleepiness during day.

6) ANTIMMONIUM TARTARICUM

- * It indicated in cough with rattling sound present. There is much mucus rattling inside but difficult to expel out. (Little expectoration).
- * Hoarseness, great rattling of mucus, but very little expectoration. Emphysema of aged.
- * Oedema and impending paralysis of lung.

7) ARSENIC IODATUM

- * Persistently irritating corrosive discharge, even after influenza continue.
- * Old nasal catarrhal.
- * Mucus membrane is raw, angry, swallowing that itches and burns.

- * Chronic pneumonia with abscess in lung, hectic, debilitating night sweat.
- * Great emaciation, threatened pyemia.

8) AVENA SATIVA

- * Best tonic for debilitating after exhausting disease.
- * Nerve tonic, nerve tremor

- * Sleeplessness.
- * Numb and weak extremities.

9) CHININUM ARSENICOSUM

- * Weariness and prostration is present.
- * Acts as a general tonic, with prompt effect.
- * Tired feeling.

- * Anorexia. Thirst for a cold water.
- * Sleeplessness due to nervous cause.

10) CINCHONA OFFICINALIS

- * Debility from exhausting disease, influenza, excess discharges (loss of vital fluid)
- * Suffocative catarrhal, rattling in chest.

- * Violent hacking cough.
- * Dyspnoea, sharp pain in the left lung.
- * Anxious, frightful, sleeplessness.

11) CONIUM

- * Great indicated in vertigo. Vertigo from any severe disease condition.
- * There is presence of debility, hypochondriasis, urinary troubles, weakened memory.
- * Trouble during change of health status.
- * Weakness of mind, body with trembling and palpitation.
- * Vertigo on lying down, when turning over in bed, when turning head sidewise, or turning eyes, worse on shaking head, slight noise.
- * Stupefying headache with nausea and vomiting of mucus.

12) EUPATORIUM PERFOLIATUM

- * Post influenza, great soreness of muscles and bones.
- * Severe body pain, muscle & extremity painful.
- * Cachexia from chronic illness.
- * Sluggishness of all organs & functions.

- * Bone pain, general & severe. Soreness is present.
- * Bitter taste in mouth.
- * Chronic loose cough.

13) GELSEMIUM

- * "DULL - DIZZY - DROWSY." These are key notes of this drugs. In post influenza cases many times these symptoms are oftenly seen.
- * Thirstlessness.
- * Muscular weakness. Complete prostration, weakness, complete relaxation.

- * Apathy regarding illness.
- * Vertigo after illness, with feeling of heaviness of head, band feeling around and occipital headache. Dull, heavy ache with orbital neuralgia.
- * Sneezing with headache and coryza.

14) IBERIS

- * Cardiac debility after influenza.
- * It controls vascular excitement in hypertrophy with thickness of heart wall.
- * Vertigo with pain around heart.

- * Hot flushed of face.
- * Violent palpitation induced by slight exertion or by laughing and coughing.

15) LATHYRUS

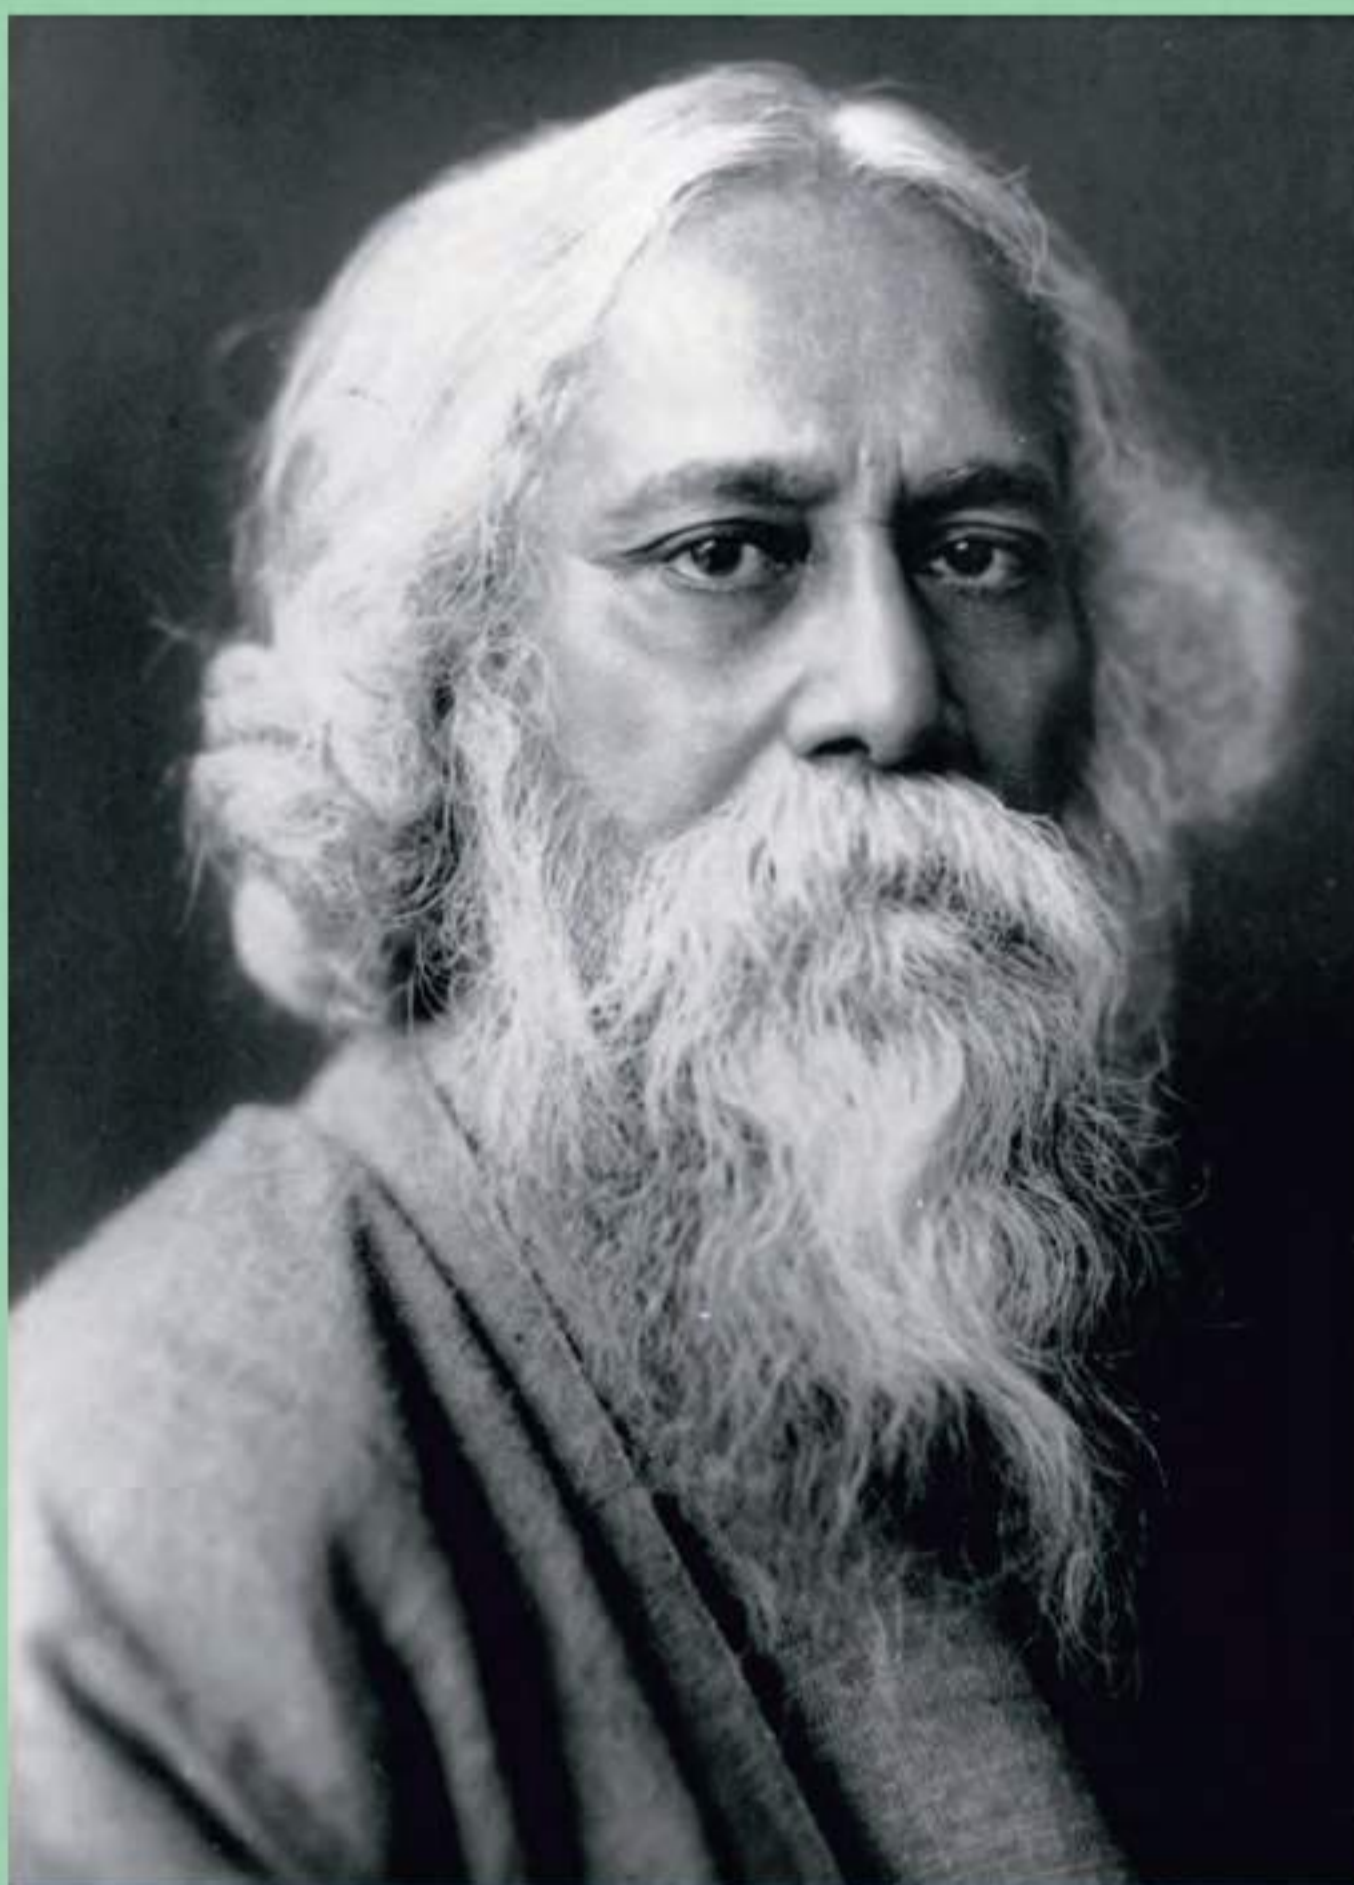

- * After influenza and wasting, exhaustive diseases there is much weakness and heaviness, slow recovery of nerve power.
- * Excessive rigidity of legs, spastic gait.
- * Stiffness, lameness of ankle and knees.
- * Calve muscles are very tense.

16) RUMEX

- * Cough caused by an incessant tickling in the throat pit, which tickling runs down to the bifurcation of the bronchial tubes.
- * Dry, teasing cough, preventing sleep.
- * Pressure, talking, inspiring cool air and at night.
- * Expectoration- thin, watery, frothy expectoration by the mouthful, later stringy & tough.

17) SARCOLACTIC ACID

- * Muscle tissue during the stage of muscle exhaustion.
- * Great value in most violent form of epidemic influenza and of its post complication.
- * There is violent, retching and great prostration is present.
- * It is used when arsenic has failed.
- * Spinal neurasthenia, muscular weakness, Dyspnoea with myocardial weakness.
- * Tired feeling with difficulty in awakening.
- * Stiffness of thigh and calves
- * Cramp in calves. Wrist pain.

RABINDRANATH TAGORE

“I have long been an ardent believer in the science of homeopathy, and I feel happy that it has got now a greater hold in India that even in the land of its origin. It is not merely a collection.”

RABINDRANATH TAGORE ON HOMEOPATHY

DR. PULKESH CHOTHANI MD (HOM)
ASSOCIATE PROFESSOR
DEPARTMENT OF REPERTORY

REPERTORY RUBRIC FOR INFLUENZA

Completer Repertory

Mind chapter

Indifference, apathy; influenza after. – CADM.
Influenza after – CADM, crot-h, cypr, gels, scut.
Prostration of mind; influenza after- , crot-h, cypr, scut.
Sadness; influenza after- ars, bry , cadm, cadm-s, gels.
Suicidal disposition; influenza after – scut.

Eye Chapter

Inflammation, retina, retinitis; influenza after – sal-ac

Nose Chapter

Inflammation; sinuses; influenza after – tub

Smell Chapter-

Loss of wanting; influenza after- mag-m

Kidney Chapter-

Inflammation nephritis, Influenza after – api, eucal.
Inflammation nephritis, catarrhal, influenza after- -eucal.

Cough Chapter

Influenza after – AM-C, ant-t, atro, bac, bell, bry, cor-r, dros, Erion, EUPHR, hyos, kali-c, kali-s, kreos, lach, menth, per, pin-a, prun-v, RUMX, SANG, silphu, STICT, still, STRY, thu, tub-a.

Chest chapter-

Inflammation; lung, pneumonia; influenza. in or after- acon. am-c, ant-ar, ANT-T, ars, ars-i, bap, beryl, brom, BRY, carb-v , con, CUPR, cur, Dig, FERR, gel, Glyc, ign, influ, KALI- BI, Merc, ox-ac, PHOS, plat, pyrog, rhus-t, seneg, sil, TUB , zinc.
Paralysis of lung; influenza after- LOB-P

Heart & Circulation Chapter

Dilation; heart; pneumonia or influenza, after- adon
Inflammation; heart; carditis, myocardium, myocarditis; influenza after- crat, cur, dig

Extremities Chapter

Lower Limbs; influenza after – ARS-S-R, GELS, ins, mag-p.
Pain influenza after remaining- ARS-SR-R, cob, GELS, iris, lycps, mag-p.
Pain; Sciatica, Sciatic nerve, left, influenza, after- iris
Pain; Sciatica, Sciatic nerve, right, influenza, after- mag-p
Pain sciatica, sciatic nerve, influenza after- ARS-S-R, GELS, iris, Lycps.

Sleep Chapter

Sleeplessness; influenza, after- aven, bell, PASSI, scut, tarent.

Fever Chapter

Hectic fever, influenza after- abrot.

Perspiration Chapter

Influenza , after- ami-n, PSOR.

Different Repertories

•Murphy Repertories- (zomeo software)

Influenza vaccination after- abrot, Bapt, Carc, chin, con, cypr, Gels, Infl, Kali-p, Merc, Ph-ac, Rhus-t, Scut, Thuj, X-ray
Influenza weakness after- abrot, carc, chin, con, cypr, GELS, kali-p, Ph-ac ,scut, x-ray

Ankle chapter-

Stitches, ankle, influenza, after- Rhod.

•Clerk Repertory-

Temperament chapter

Children cough of, after influenza- sang
Debility nervous, after Influenza- sang.

•Knerr Repertory

Inner Head Chapter

Headache(undefined), Weather, ,from change Exposure, after(influenza)- rhus-t

Nose Chapter

Coryza influenza, in day, more during, and after meals- Phos.
Coryza influenza, in Mercury, after abuse of- kali-i
Throat stitching sing from effort to (after epidemic influenza) - agar

DR. UNNATI B. PATEL MD (HOM)
ASSISTANT PROFESSOR
DEPARTMENT IN FM & T

CASE STUDY : 1

Date- 7/5/21

PATIENT NAME-G. Patel

SEX - MALE

AGE- 36yr.

CHIEF COMPLAIN :-

Location	Sensation	Modality	Concomitant
General body-	Weakness, debility, body pain, sleeplessness	Patient has history of COVID INFECTION. After its treatment all complain starts.	
Extremities-	Trembling of hand. Weakness in grip of hand.	All complain present since last 10 days (Post covid period)	
GIT-	Constipation with unsatisfactory stool. Acidity. Sour belching with burning in chest.		

PERSONAL HISTORY:-

- * Thirst- decrease.
- * Appetite- decrease
- * Desire- spicy food.
- * Perspiration- scanty, not much.

TOTALITY OF SYMPTOMS:-

- * Constipation with unsatisfactory stool
- * Acidity
- * Weakness, body pain
- * Trembling of hand.
- * Desire for spicy food.
- * Loss of appetite.
- * Sleeplessness.

REPERTORIAL TOTALITY:-

- * Antibiotics, poisoning, ailments from
- * Constipation
- * Stomach, acidity
- * Weakness, debility with
- * Trembling hand.

Medicinal result- NUX- VOM (16/5), ARS (14/4), NIT-AC (14/4),CHINA(13/4)

PRESCRIPTION & FOLLOW UP:-

- * Antibiotics, poisoning, ailments from
- * Constipation
- * Stomach, acidity
- * Weakness, debility with
- * Trembling hand.

Medicinal result- NUX- VOM (16/5), ARS (14/4), NIT-AC (14/4),CHINA(13/4)

1 st prescription (7/5/21)	On Totality based	<p>NUX VOMICA 30 / 4 pills BD for 3 days SAC LAC 30 / 4 pills BD for 7 days</p> <p>ALFA ALFA Q- 10 drops TDS for 10 DAYS.</p>
18/5/21	<p>Better in all complain. Constipation resolve. Patient start to pass normal stool. Trembling in hand mild present only Appetite improved.</p>	<p>ALFA ALFA Q continue for 7 days. Placebo 4 pills BD for 7 days.</p>
26/5/21	<p>No body ache. No any complain present. Patient is totally restore his healthy state.</p>	No Medication required.

DEPARTMENT OF MATERIA MEDICA

CASE STUDY : 2

PATIENT NAME - TD

DATE - 26/4/21

CHIEF COMPLAIN :-

Dyspnoea on Exertion after Covid-19 before 20days

Constipation of long standing – patient is taking daily “Churna” since 20yrs

Past History:

Covid-19 disease before 20 days (40% lung involvement)

Chronic Constipation

Personal History:

Appetite: Normal

Thermal: Hot

Thirst: Thirsty

Desire: Fried Food

Aversion: -

Sleep: Disturbed

Dream: -

Stool: Constipation. No urging for 7days if not taking churna

Urine: NAD

Perspiration: Normal

Life History:

His family members even son throws things toward him during corona disease what he didn't likes.

Her daughter had denied to serve his families' need like food, cooking etc.

(Mocking sarcasm – Observation)

No one is to take care of him and his family.

He felt hurt for that. (Observation – mocking sarcasm)

Patient had 2 mothers – 1st Mother had only girl child so patient's father had done second marriage.

Both mothers were stayed together.

Mother had 2 elder sisters and 1 elder brother.

Analysis

Delusion despised

Mocking Sarcasm

abuse of purgatives

Analysis uses 3 rubrics.

	lach	nux-	chan	carb	sulph	bry	nit-a	tarel	lyc	sep
	100	63	49	43	43	39	35	34	20	20
	3	2	2	2	2	2	2	2	2	2
48 Mind; Delusions, imaginations; despised, is	3									
59 Mind; Mocking; sarcasm	3	1	1	4	1	1	3	3	1	1
38 Generalities; Intoxication, after; purgatives	2	4	4	1	3	3	1	1	1	1

Rx, Lach 200 1dose. SL TDS
